Frequency Electronics, Inc. Announces Inaugural Quantum Sensing Summit: A Pioneering Event to Shape the Future of Quantum Technology

Sep 6, 2024

MITCHEL FIELD, N.Y., Sept. 06, 2024 (GLOBE NEWSWIRE) -- Today Frequency Electronics, Inc. ("FEI" or the "Company") (NASDAQ-FEIM) is proud to announce the inaugural Quantum Sensing Summit, an exclusive gathering of the brightest minds, leading industry players, and key government decision-makers dedicated to advancing the field of quantum sensing. As both host and sponsor, Frequency Electronics is committed to driving innovation and transforming research discoveries into real-world applications.

The summit will be held on October 10-11, 2024 in New York, NY and will bring together leaders from government, research, and industry for a one-day event focused on "Achieving Production-Ready Quantum Sensing Technologies." With an agenda designed to foster collaboration, the summit aims to bridge the gap between cutting-edge research and the practical deployment of quantum sensing solutions.

The agenda includes presentations from top university and government research institutions, highlighting the latest breakthroughs in quantum sensing. Attendees will gain a comprehensive overview of the development of critical quantum-enabling technologies, including lasers, photonic integrated circuits (PICs), traps, micro-resonators, frequency combs, and high-finesse cavities.

"Frequency Electronics has a long-standing commitment to the 'sensing' aspect of quantum technology, and we recognize the transformative potential that lies within this domain," said Tom McClelland, CEO at Frequency Electronics. "Our goal with this summit is to catalyze meaningful collaborations to drive the next generation of quantum technologies."

The event is expected to attract between 100 and 150 attendees, including a strong presence of government decision-makers, making it a unique opportunity for influencing policy and driving strategic partnerships. With a focus on practical outcomes, the summit will serve as a platform for discussions that could shape the future of quantum sensing.

About Frequency Electronics

Frequency Electronics, Inc. (FEI) is a world leader in the design, development and manufacture of high precision timing, frequency generation and RF control products for space and terrestrial applications. FEI's products are used in satellite payloads and in other commercial, government and military systems including C4ISR and electronic warfare, missiles, UAVs, aircraft, GPS, secure communications, energy exploration and wireline and wireless networks. FEI-Zyfer provides GPS and secure timing capabilities for critical military and commercial applications; FEI-Elcom Tech provides Electronic Warfare ("EW") sub-systems and state-of-the-art RF and microwave products. FEI has received over 100 awards of excellence for achievements in providing high performance electronic assemblies for over 150 space and DOD programs. The Company invests significant resources in research and development to expand its capabilities and markets.

FEI's Mission Statement: "Our mission is to transform discoveries and demonstrations made in research laboratories into practical, real-world products. We are proud of a legacy which has delivered precision time and frequency generation products, for space and other world-changing applications that are unavailable from any other source. We aim to continue that legacy while adapting our products and expertise to the needs of the future. With a relentless emphasis on excellence in everything we do, we aim, in these ways, to create value for our customers, employees, and stockholders."

Forward-Looking Statements

The statements in this press release regarding future earnings and operations and other statements relating to the future constitute "forward-looking" statements pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Forward-looking statements inherently involve risks and uncertainties that could cause actual results to differ materially from the forward-looking statements. Factors that would cause or contribute to such differences include, but are not limited to, our inability to integrate operations and personnel, actions by significant customers or competitors, general domestic and international economic conditions, reliance on key customers, continued acceptance of the Company's products in the marketplace, competitive factors, new products and technological changes, product prices and raw material costs, dependence upon third-party vendors, other supply chain related issues, increasing costs for materials, operating related expenses, competitive developments, changes in manufacturing and transportation costs, the availability of capital, the outcome of any litigation and arbitration proceedings, and failure to maintain an effective system of internal controls over financial reporting. The factors listed above are not exhaustive and should be read in conjunction with the other cautionary statements that are included in this release and in our filings with the Securities and Exchange Commission. The Company's Annual Report on Form 10-K for the fiscal year ended April 30, 2023, filed on July 27, 2023 with the Securities and Exchange Commission includes additional factors that could materially and adversely impact the Company's business, financial condition and results of operations, as such factors are updated from time to time in our periodic filings with the Securities and Exchange Commission, which are accessible on the Securities and Exchange Commission's website at www.sec.gov. Moreover, the Company operates in a very competitive and rapidly changing environment. New factors emerge from time to time and it is not possible for management to predict the impact of all these factors on the Company's business, financial condition or results of operations or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. Given these risks and uncertainties, investors should not rely on forward-looking statements as a prediction of actual results. Any or all of the forward-looking statements contained in this press release and any other public statement made by the Company or its management may turn out to be incorrect. The Company expressly disclaims any obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.
